PROFILE

Objective:

Seeking an opportunity where I can leverage my technical skills, integration experience, and strong interpersonal abilities to contribute to efficient system implementations, collaborate with diverse teams, and grow both personally and professionally.

Education:

Bachelor of Science in Information Technology
Cebu Institute of Technology - University

Work Experience:

Topdial (October 6 2020 – January 29, 2022) – Sales Representative
Teleperformance (April 20, 2022 – June 9, 2024) – Customer Service
EXL (June 24, 2024 – October 4, 2024) – Customer Service
Automancers - Part Timer(June 2024 - Present) – Backend Developer
Accenture (October 2024 – Present) – Integration Consultant

INDUSTRY EXPERTISE

- Project management fundamentals, including planning, coordination and timelines.
- Backend software development, system implementation and debugging.
- System integration exposure, including benefits configuration, data mapping and client onboarding

FUNCTIONAL EXPERTISE

- Backend Development
- Integration Consulting (UKG Ready Benefits)
- API & File Based Integration
- IT Technology & Systems Support
- Performance Optimization
- Database Management & Data Validation

GENERAL SKILLS

- Strong problem-solving and analytical abilities
- Excellent teamwork, communication and client coordination skills
- Effective time management and multitasking in fast-paced environments
- Adaptable, detail-oriented, and quick to learn new technologies and systems

SELECTED PROJECT EXPERIENCE

Integration Consulting Experience

- Experienced Integration Consultant supporting UKG Ready Benefits system configuration and end-to-end integration activities, including API and file-based data integrations, data mapping, validation, testing, and troubleshooting to ensure accurate and reliable data flow. Collaborated with clients, vendors, and internal teams during benefits onboarding and implementation, while preparing documentation and providing implementation support to improve system workflows and client experience.

Backend Development Experience

- Background as a part-time Software Engineer with hands-on experience in developing and maintaining backend API endpoints, debugging application issues, and implementing data validation and sanitization techniques to enhance system stability, security, and performance. Actively supported feature implementation and system enhancements through close collaboration with development teams.

Customer Service & Communication Experience

- Strong customer service background with consistent achievement of top performance metrics. Experienced in mentoring new team members and applying excellent communication, time management, and multitasking skills in fast-paced, client-facing environments.

Technology Training & Professional Development

- Completed Accenture Technology Analyst School (ATAS) and TechIskwela Bootcamp training, gaining practical exposure to backend development, API integration, debugging, and collaborative software development workflows.
